
PEOPLE

E-Te'k
"Will you permit me to imagine a safe return, of both myself and my new friend, whom you have yet to meet, to your dwelling?"

O-Lanka't / Aunt O
"Take care, little one. See you soon for new adventures! May fortune guide you!"

Edo Gomuk
"I am forever grateful and infinitely delighted, and will write more in the next days, months, and years to help you and E-Te'k—my dear friends—to complete your vital campaign."

Marya Grimm / Sister M
"Please pick up the specimen as soon as you can; after the documentation is submitted, your job begins, not ends!"

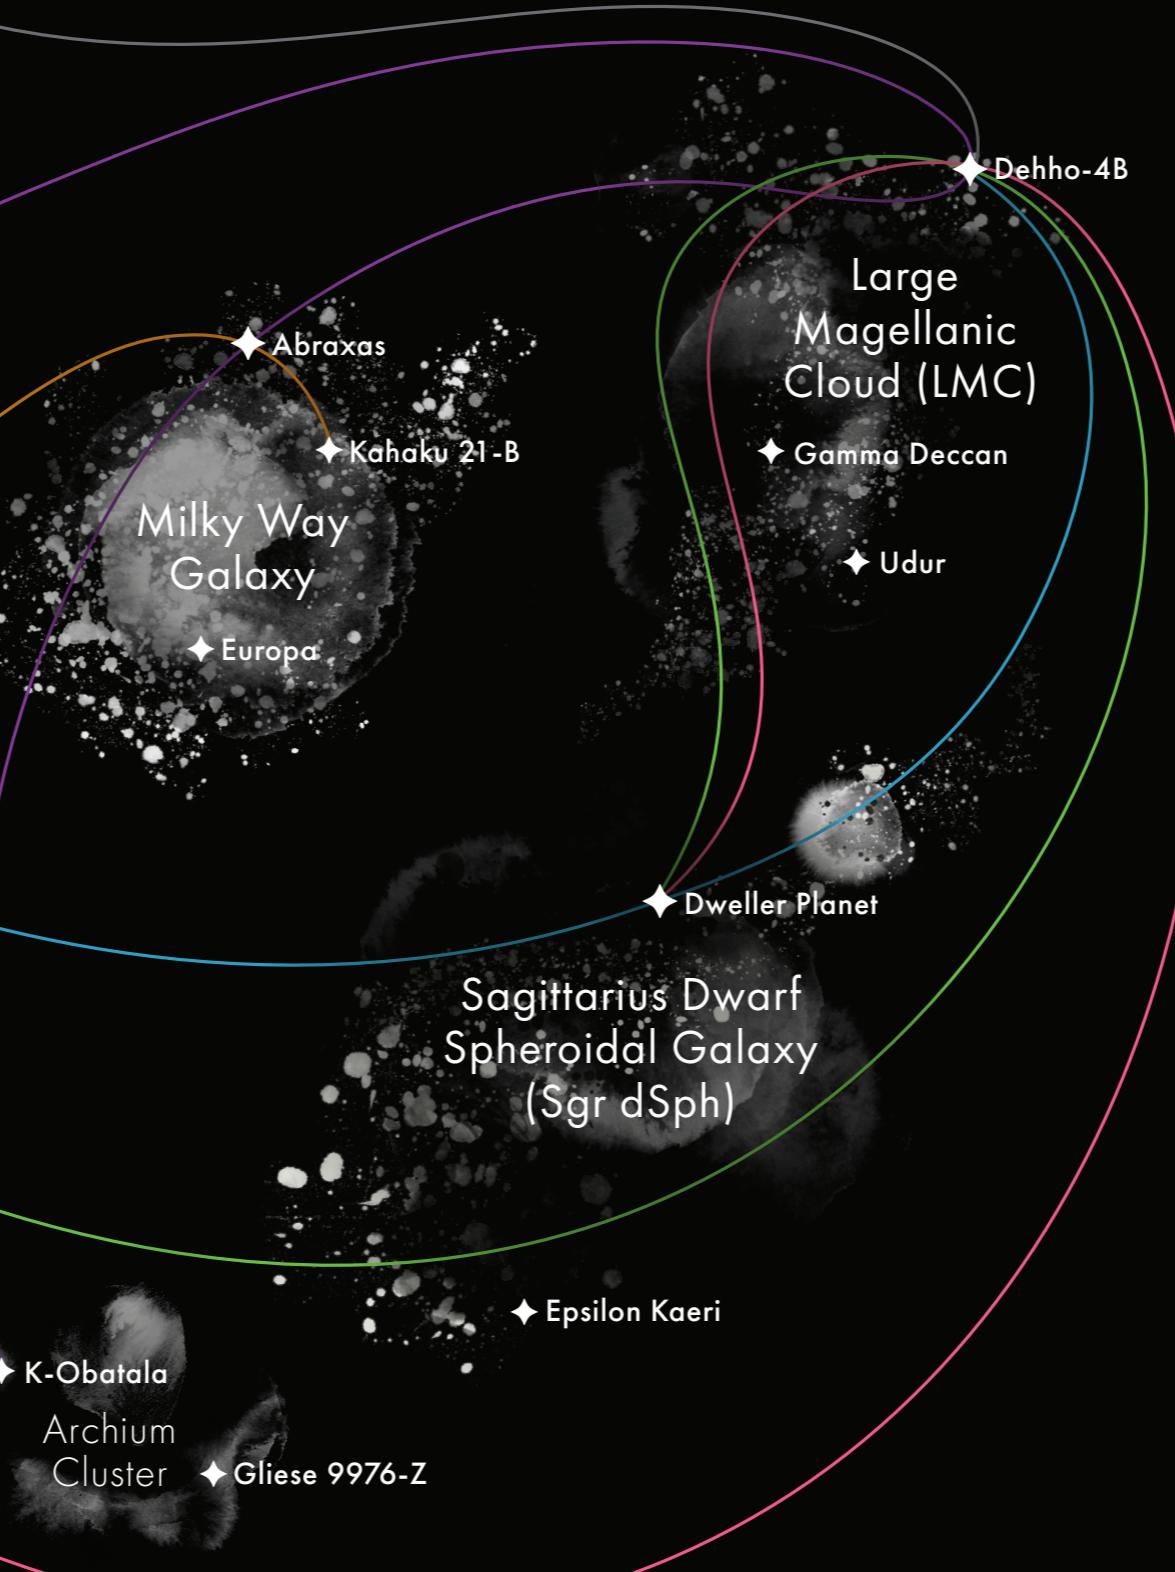

Marra
"I'm glad I don't live here! If I did, would have to learn to read the Dweller language, which smells bad..."

"I know you don't think these animals can think or feel anymore, but, in this, my love, I think you to be mistaken."

THE LOST MAIL REDISTRIBUTION PROGRAM

ORGANIZATIONS

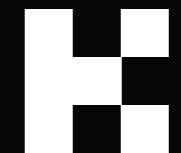

Intergalactic Postal Works
One-stop provider for all your interstellar messaging needs! Organizers of the Lost Mail Redistribution Program. Headquartered on Abraxas with stations on Europa, Epsilon Kaeri, and Gamma Deccan.

The Academy of Animal, Vegetable, and Mineral Rights
Dehho-4B global government agency regulating the life cycles of lab-grown and bio-produced life forms and substances.

Neupfon Daughters Orchards
Your friendly neighborhood adoption center for unique and lovable bio-modified specimens, located on beautiful Dehho-4B!

Kahaku 21-B Museum of Science
A state-of-the-art public facility celebrating the diverse scientific achievements of the Kahaku Cluster.

SecondSun Reflections
A non-profit interdisciplinary science magazine located on the Dweller Planet.

TECHNOLOGIES

ID/Checksum

The wildly redundant ID/checksum system was widely adopted for its ability to accommodate any number of additional systems.

Dweller Language

This biochemical language spans a number of organic and inorganic systems on the so-called "Dweller Planet".

Revised Abraxas Accords

Drafted on Abraxas, the Accords reflect the current best pan-human articulation of beinghood. The Accords are designed to be continually revised.

Digital Scientific Exchange Channel

Maintained solely by the Kaha infrastructure services on Kahaku 21-B, the only pan-human channel that includes high resolution digital transmission is reserved solely for scientific communication.

Molloscope

Developed by Kaha scientist Ayin Tay Kon, the molloscope is an external psychochemical therapeutic device to relieve the stress of massive-distance travel in humans.
